

SHOCK BOX+ ROTAIID

High Visibility

The Shockbox Rotaid is an innovative AED wall cabinet that ensures recognisable and robust storage for your AED. The characteristic round shape and highly visible yellow colour, coupled with the "always on" interior lights and unique instructional backboard, make it easy to be seen and easy to use.

Easy to Use

The cabinet can be opened by an intuitive twist that removes the whole cover. The rescuer therefore has full and easy access to the AED. The cover is attached to the back plate by a strap and needs no further attention from the user.

A stainless steel eye allows for the use of security tags, seals or padlocks if desired.

All Weather

A specially designed heater maintains an inside temperature of at least 5 degrees centigrade even when temperatures drop to -25 degrees centigrade. The automatic and gradual operation makes it particularly effective and efficient.

The materials used are tested to provide long lasting protection for the defibrillator.

Exclusive CHT 3 Year Warranty
Class 2 Electrical Device

Durability

The cover, equipped with recesses for an optimal grip and directive arrows, is made from 100% Polycarbonate. With a thickness of 5mm it offers solid protection and offers a high degree of water & particle ingress resistance. Furthermore, the cover is fitted with UV filters, to protect from direct and indirect sunrays. Appearance decay, rust and residue accumulation are excluded.

Dimensions Ex Backboard

- Length 48 cm
- Width 48 cm
- Depth 18 cm
- Weight 6.7kg
